Albany Library Historical Photograph Collection

Peralta Park Hotel, 1923

The Albany Library's Historical Photograph Collection contains more than 600 photographs related to the history of Albany, dating from the 1860s to the present. These photographs were part of the collection of the Albany Historical Society, and were donated to the library in 1994. More photographs are being added to the collection all the time, as materials donated by the Historical Society continue to be processed, and members of the community come forward to make new donations.

In 2001-02, the Albany Library embarked on a project to digitize the Historical Photograph Collection and make access to information about the photographs available through the library's catalog. Federal funding for this project came from the U.S. Institute of Museum and Library Services, under the provisions of the Library Services & Technology Act (LSTA), administered in California by the State Librarian.

Record harvested via OAI PMH 2-27-

2007

Orig. No. 68 Sta. No.

Locality Michigan: Little S. Br. P. on Marquette R., Sec. 9, T. 16 N.
(Home), R. 12 W., Newaygo Co.

Water: spring and surface - bed, considerable spring floods: clear, clean.

Vegetation: few small patches of oak - grass, and few reeds & Sagittaria

Bottom: conglomerate & many boulders, at intervals ^{logs} timber. Temp. 71° - Air 50°

Shore: oaks, swamps, aspens, meadows, etc. Current: strong

Distance from shore: over middle 40-50 ft. Tide:

Depth of capture: Depth of water: over 20 feet

Method of capture:

Collected by Sangler & Moody. Date: VII. 6: 1926

Orig. preserv. Time:

Caddis flies exceedingly abundant, also crayfish.
few snails & seeds.

76 rainbow trout; 6 brown trout; 1 great northern
pike; 12 common suckers; 1 Cottus bairdii; 13 Cottus
cognatus; 4 black-nosed dace; 1 blunt-nosed minnow;
5 northern dace; 4 Johnny darters.

- 71300 - Cottus bairdii bairdii (1)
- 71301 - Esox lucius (1)
- 71302 - Cottus cognatus (22)
- 71303 - Bolesoma nigrum nigrum (4)
- 71304 - Salmo faxio (7)
- 71305 - Salmo i. viridus (16)
- 71306 - Catostomus c. commersonii (13)
- 71307 - Hybostichus notatus (1)
- 71308 - Margariscus margarita nachtrubi (5)
- 71309 - Rhinichthys atronaseus lunatus (4)

Why Share?

- **Sharing benefits users**
 - One-stop searching (maybe)
 - Ability to create customized searches of specific domains
 - Brings together distributed collections
- **Sharing benefits your institution**
 - Increases exposure of collections
 - Broadens user base
 - Potentially adds collaboration opportunities
 - We can no longer assume that users will come through the front door—sharing metadata gets us “in the flow”

Sharing better allows our users to help us

Albany Italian Band, 1910

How You Can Help

- Can you help us identify some of the people, places and events in these photographs?
- Are you aware of an error in the information we have provided for a photograph?
- Do you have photographs or other materials pertaining to the history of Albany that you would like to donate or lend to the Albany Library?

If so, please contact the Albany Library, 1247 Marin Avenue, Albany, CA 94707.

Phone: 510-526-3720

Sharing metadata: Federated search

The distributed databases are searched directly.

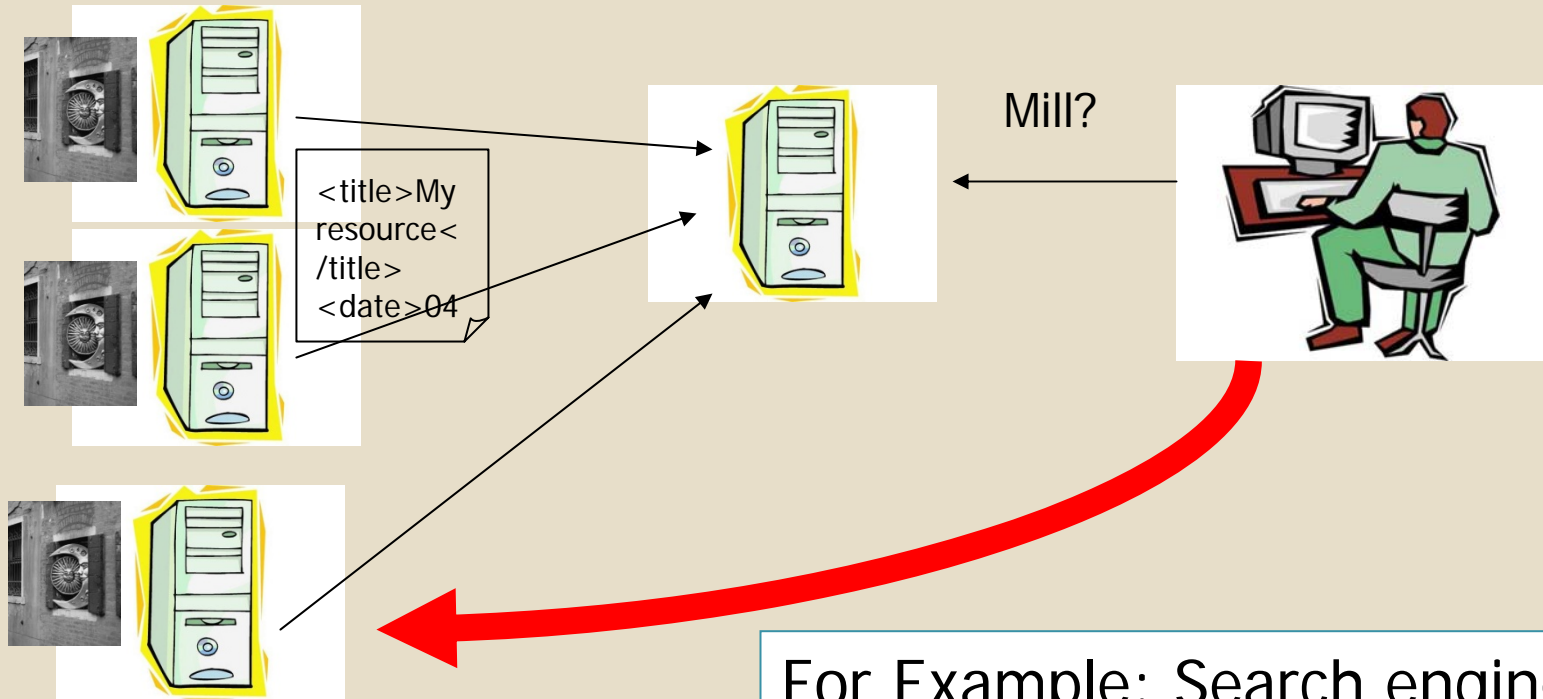

For Example:
Z39.50, SRU

Sharing metadata: Data aggregation

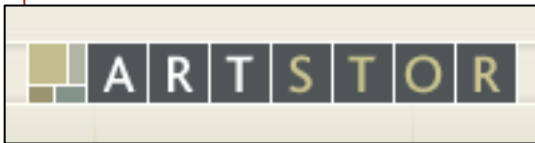

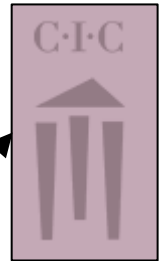

The user searches a pre-aggregated database of metadata from diverse sources.

For Example: Search engines, union catalogs, OAI PMH, RSS

?????

Collection Registries

Photograph from
Indiana University
Charles W. Cushman
Collection

Today's metadata aggregation environment

- Users often discover material through shared records, not through your front door
- Users don't know about your collection or won't remember it
- Shared records lead users to local environment where full context is available
- Because users enter through “deep” links, they may bypass introductory information that provides the larger context for a collection

Finding the right balance

- **Metadata providers know the materials**
 - Document encoding schemes, controlled vocabularies, and metadata creation practices
 - Ensure record validity
- **Aggregators have the processing power**
 - Format conversion
 - Reconcile known vocabularies
 - Normalize data
 - Batch metadata enhancement

Shareable Metadata...

- Is *quality* metadata
- Promotes search interoperability - “the ability to perform a search over diverse sets of metadata records and obtain meaningful results” (Priscilla Caplan)
- Is human understandable outside of its local context
- Is *useful* outside of its local context
- Preferably is machine processable

Shareable Metadata as a View

- Metadata is not monolithic
- Metadata should be a *view* projected from a single information object
- Create multiple views appropriate for groups of important sharing venues
- Depends on:
 - Use
 - Audience

The Cs & Ss of Shareable Metadata

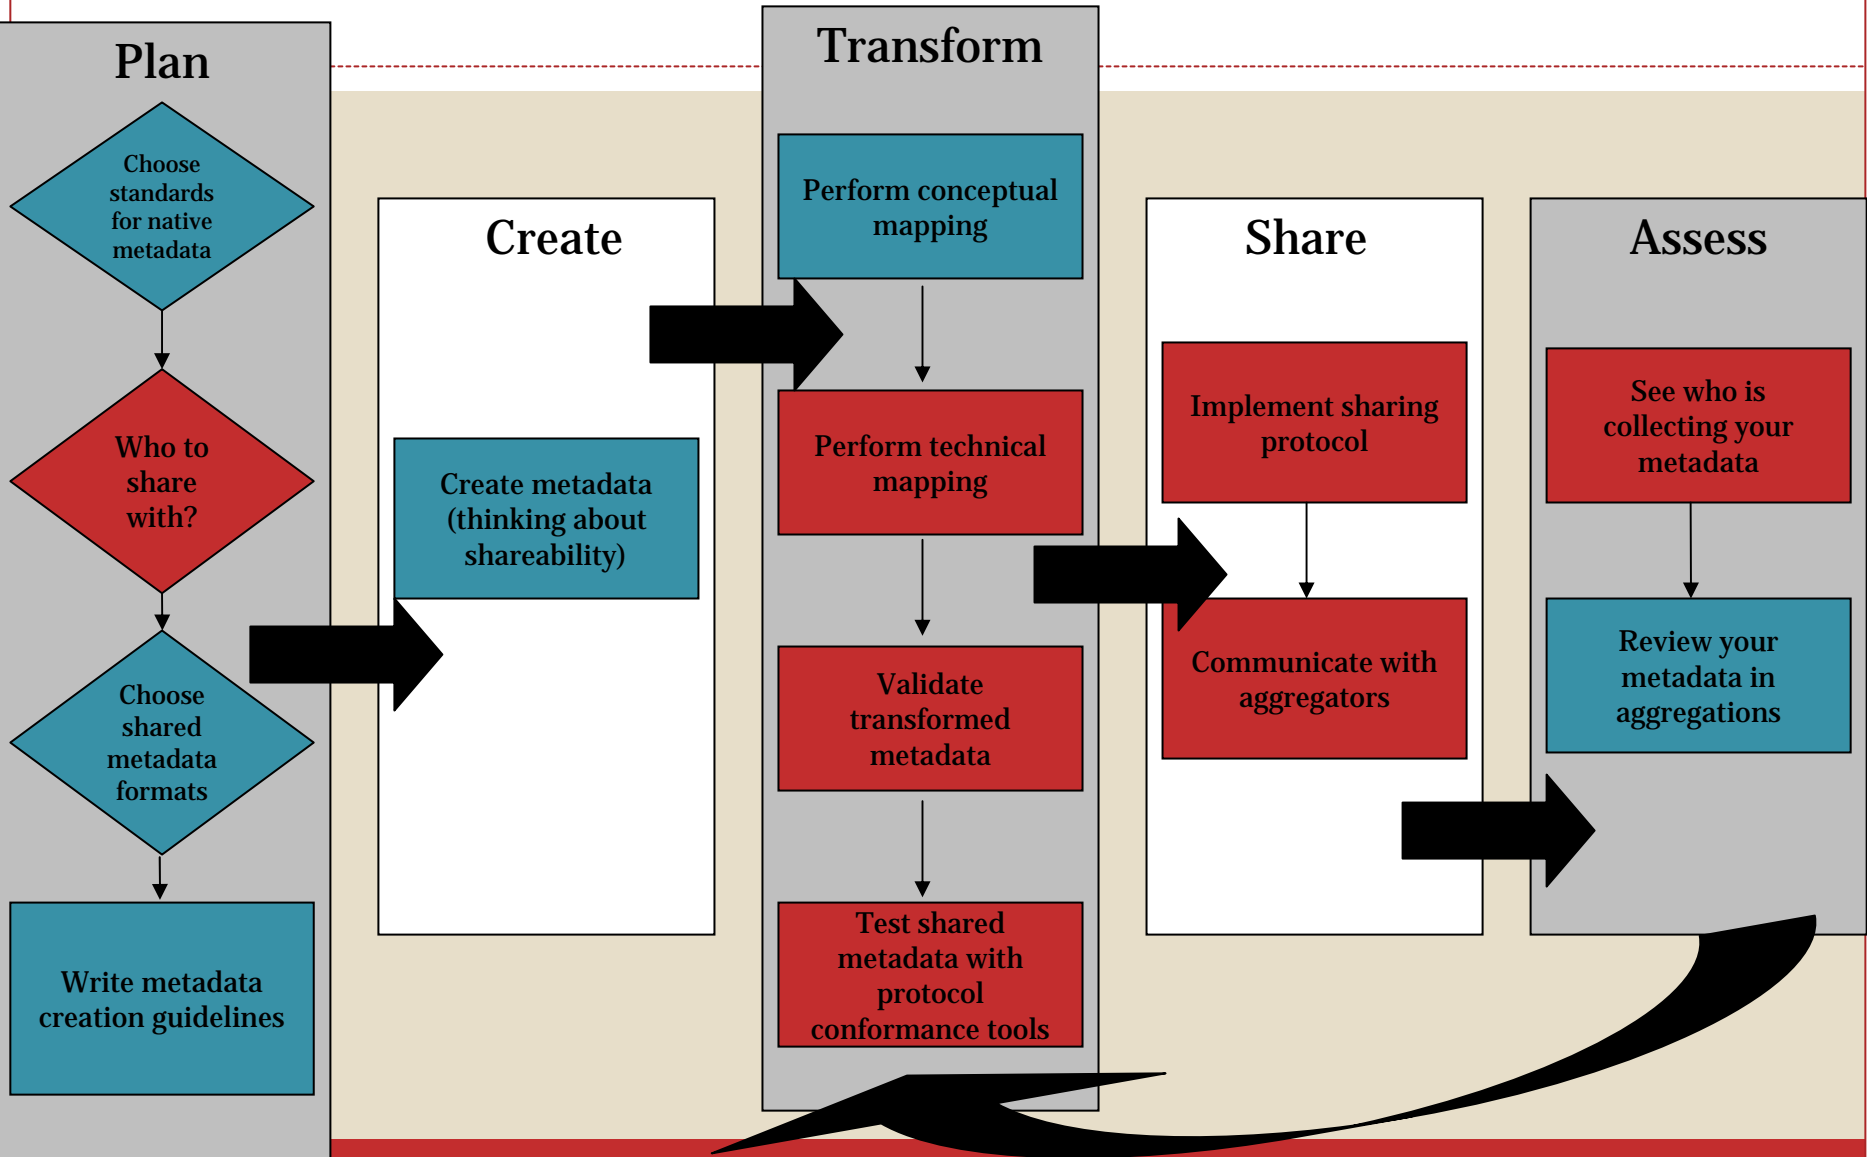

Content
Coherence
Context
Communication
Consistency
Conformance to
Standards

Basic metadata sharing workflow

Three possible OAI-PMH workflows

Crosswalking – conceptual mapping

Metadata Standards Crosswalks

Pathways to Digital Information - Crosswalks

The crosswalk below includes only a partial list of the elements for each standard, focusing on the areas of overlap. This crosswalk is for planning purposes. For the full list of elements for any one of the standards below, click on the name of the standard at the top of the column. (To print this crosswalk from your Web browser, use the tabloid 11 x 17-inch paper size setting, landscape print format, .25-inch margins. Alternatively, print from the PDF version.)

Working around system limitations

- Many digital asset management systems don't support a second shareable copy of records
- Do your best to split the difference with system records
- Use creative interface design for your local system
- Use extra-protocol documentation for communicating with aggregators
- Lobby your vendor!

Before you share...

- **Look at the record as the aggregator will see it**
 - Appropriate view?
 - Consistent?
 - Context provided?
 - Does the aggregator have what they need?
 - Documented?

Can a stranger tell you what the record describes?

Thank you!

- Questions?
